

# COUNTRY ROAD CAMPERS

Building your Home from Home

Luxury campervan conversions, beautifully hand crafted in the heart of rural Leicestershire

## About Us

Here at Country Road Campers we combine stylish interior design with practical functionality to create beautiful van conversions that look and feel like a true home from home.

We specialise in converting Fiat Ducato, Peugeot Boxer and Citroen Relay vans of various sizes. These modern and reliable vans make ideal base vehicles due to their class-leading payloads and width which allow a flexibility of design that simply can't be achieved with other makes and models.

As a family business, run by fellow van owners, we have a genuine passion for helping others to make their camper dreams a reality.

## Pricing

Prices of Country Road Campers conversions start at £28,500 inc. VAT. After you've brought your Ducato, Boxer or Relay van to us, we provide all parts and labour needed to make your dream campervan a reality.

We work closely with you prior to and throughout the build to ensure that all aspects of the design are in line with your specifications, as well as supporting the process by presenting ideas, recommendations and honest advice from our own experience.

Country Road Campers provide several fixed price conversion options as well as a bespoke service. Please contact us for a consultation to find out more.

All costings provided in this brochure are inclusive of VAT.

From

£28,500

# Solar Package: What's included?

The Solar Package is an optional upgrade which can be added to the Country Build for an additional cost.

This option allows a lot more off-grid flexibility by harnessing solar power to meet your energy needs without relying on an electric hook-up. The package also allows you to use domestic 240v appliances on your travels.

- High output solar panel/s (>400W)
- Upgrade to lithium leisure battery (12v ~200Ah)
- 40A MPPT solar charge controller with remote monitor
- Sterling split charger
- 1200W 240v power inverter/ charger with remote monitor
- 2 x 240v double sockets

£5,850

# Four Seasons Package: What's included?

The Four Seasons Package is an optional upgrade which can be added to the Country Build for an additional cost.

This Package adds underfloor heating and blown heat, meaning that your camper will be comfortable to use even in the winter months. It also provides a hot water supply to the kitchen sink and a shower point.

- Eberspacher diesel powered water heater
- Surecal hot water calorifier (tank)
- Programmable heating thermostat
- Underfloor heating system
- Auxiliary blow heater
- Bullfinch shower point
- Hot water immersion heater and timer

£6,700

## Off-Grid Package: What's Included?

The Off-Grid Package is an optional upgrade which can be added to the Country Build for an additional cost. Adding the Off-Grid Package to your conversion allows you to include all the features of both the solar and four seasons packages at a discounted rate.

- 2 x High output solar panels (>400W)
- Upgrade to lithium leisure battery (12v ~200Ah)
- 40A MPPT solar charge controller with remote monitor
- Upgraded Sterling split charger
- 1200W 240v power inverter/ charger with remote monitor
- 2 x 240v double sockets
- Eberspacher deisel powered water heater
- Surecal hot water calorifier (tank)
- Programmable heating thermostat
- Underfloor heating system
- Auxiliary blow heater
- Bullfinch shower point
- Hot water immersion heater and timer

£12,000

# Bespoke Builds

At Country Road Campers we use only premium quality materials for our luxury Country Builds. This allows for plenty of flexibility in choosing the fixtures, fittings, colours and finishes of your conversion without additional costs. We work closely with you in the design stage and throughout the build to perfectly execute your vision for the van's interior, based on our well established layout.

We do recognise, however, that every camper dream is unique. For those who have more specific requirements or a non-Boxer/Ducato/Relay base vehicle, we offer a Bespoke Build service, where we are able to create unique layouts and features, bringing your distinctive vision to life. Bespoke builds are priced on an individual basis and include a design fee but do not necessarily have to cost more. We are able to provide a guide price following a free initial consultation.

# Our Process

A Country Road Campers conversion starts with an initial consultation. This free, no-obligation meeting can be held face-to-face, over the phone or via video call. We discuss your requirements and you have the chance to ask us any questions. Following this meeting, we will provide you with an estimated cost. Please don't worry if you've yet to find a van or don't even know where to start! We can advise you about which van will best suit your requirements and can even support you in the process of sourcing this.

If you are happy to proceed following the initial consultation, we require a £2000 deposit. This is non-refundable but will be deducted from the final cost of the build and will secure your build start date in our diary. On receipt of this payment, we meet with you again to begin setting out the specifics of your conversion and work with you to produce a design that you love. We are able to give a final costing at the end of this process.

50% of the total cost is required 30 days prior to the start date, at which point we begin to purchase materials and components specific to your conversion.

You will need to drop your van off at our workshop for the agreed start date so we can get to work on the build. Your van is in safe hands with us in our fully insured, secure workshop. A further 25% of the final cost is payable at this point.

A typical build takes 12 - 18 weeks. We keep you updated throughout and welcome visits to the workshop to see things taking shape. On completion, you inspect your van to make sure you're 100% happy with it and we require the remaining balance to be paid when handing over the keys.

# Contact Us

We're always happy to hear from you whether it's to discuss any queries you may have or to get the ball rolling with designing your dream camper!
